

# Is This a Good Time to Use AI?

When you're weighing whether or not to use AI in a particular instance, here are some helpful questions to filter your decision...

- What do I gain by using this?
- What do I lose by using this?
- What does this technology promise me?
- What does this technology cost me?
- Does using AI in this way help or hinder me in reflecting God's character?
- Is using AI in this way fulfilling or abdicating my responsibility?
- If I use AI for this, will I be loving God and neighbour more or less?
